This is so bizzare i mean i modified the Orca Rockets to do +50 damage and the Apache Rockets to!

Anyways whenever i get into a Apache/Orca and attack something with the rockets it comes up with a message saying that i am using the "Weapon Damage Hax" and that i am BANNED! I mean WTF i am the Host/Admin of the server and it bans me...no big problem as i can unban myself but i am totally like WTF with this....i think it is something with the NR not knowing about my modifications

I found this is a file called BIATCH in my FDS!
