bat66wat6 wrote on Sat, 27 October 2007 09:07No need to hit him really, he has a seperate comp so if they BAN him which i hope they BAN him then i can still play on Servers that he can't

+Anyways, BIATCH...? I have something like that in my RenegadeFDS somewhere....it's some sorta Anti-Cheat aint it?

Anyways, there isn't much effort to prevent it though is there....all servers should run Anti-Cheat i mean my BRO went in and out of servers like he owned emm and killed people with a shitty 500 sniper or even a shotgun at close range with 1 shot in the GIANT heads that are like the size of a Tree

I am so dissapointed in him! He said "I don't care if it's a cheat or a hack, loads of people cheat!"

He always complained that in SniperFights people were using Aimbots on him and that they were using BigHEads hack on him....

That has to be the worst post concerning Renegade I've ever seen. Shotguns are supposed to be used at close range, and they are supposed to KILL in one shot at close range. What the hell is a "shitty 500 sniper", the best snipers in Renegade swear by it.

Your average kill count per game is about three, right?
