Thoes are the old RxD links, I am talking about RxD 3.0

Okay here is what RxD is, install the renegade demo onto your computer so you have the crapy C&C_Under map. Now go to the RxD link, *LINK HERE* and download and install the RxD client. RxD is a program that changes the standard renegade demo and adds ALL of the multiplayer maps like Islands-Mesa-Complex-Canyon-Field, adds brenbot, full lan support, multiplayer practice, WOL, up-to-date scripts and bhs and all of the other DLL's. I will post some screenies soon.
