HTML wrote on Tue, 30 October 2007 14:50all the scripts are named cnc\_c130drop

and when i try to put 2 in htye dont work is there a way to put more then one drop script in the data folder

You mean like have two cnc\_c130drop files in your data folder? If yes, the no.

BUT! You can change the time interval of what you want to spawn. Then create another object later. That should do it.
