Today as of 6.30 i was playing on Mizzo12.I Joined the game and it was on volcano.Nod had killed all gdi building except power plant.Nod had nothing but a Hand.I go into tunnels with a shooter to get some kills.I had about 8 other people with me.Suddenly a shutgun trooper named "neoxxx" rushes in and proceeds to kill all us with headshot.I was in the back of the pack and i noticed with he didnt one shot.When I died his health was in yellow.Iv played this game for about long as it has been out and i have never seen anyone that good.I respawned and went into the power plant tunnel.About 6 of us were there and he had a shooter.Again,He mowed us all down.I dont know any way in hell that 1 shooter can take out 6 of us and escape with yellow health again.Now im a really good player and pretty good with a shooter and I could barly hit him.I hit tab and he had,117 kills and 17 death.How the hell can someone do that.My friend in my clan is an admin on that server and he Looked at his ip.There were other people on the server also with an aimbot.We kicked the one with 117 kills and later he rejoined under a different name.He still was the name way.About 6 people on the server had it,They had things with like 32/6.I want to warn all admins about this problem.

I dont know how were going to solve this problem but it needs a fixing.Now this isnt some stuped post by a n00b,Iv won the cup 3 times for clan and ranked 25 as of now.
