Projectile, Vis and Camera on the Vehicle Mesh

VIS?!? LOL

This is vis. Don't use that collision on a worldbox

Vis is an option in the collision settings to allow the model to be shaded by lights. (Just look at the picture above)

@Gen_Blacky Yeah that green outline is what your bounding box defines. Also you wont need a worldbox, just bounding will do fine on that.

EDIT: And I did forget to mention that those settings are for the boundingbox, worldbox just have physical and bounding box needs to have ObBox checked.

EDIT2: Hell, here is just an example.
