heh, I can imagine getting addicted to this game when you'r new.. I was once way to addicted to this game, but that was like 3 years ago. Now a days I play a couple of games from time to time just for the sake of it. Frankly Renegade is the only game I play. Because its unique, and so far no Renegade 2 has come out, so I doubt the addiction will come back.

I don't see a problem with a Renegade addiction as you don't harm anybody with it. Unlike alot of other addictions besides that Renegade end's after a amount of time ( Just one round/map), unless marathon.. so it's not World of Warcraft like game-type which really hooks people up.

Your still young I would take it while you still can, the only downside I see of the time that I played Renegade alot. Is that there was so much to learn which I am doing right now. Which you won't learn when you spend your time playing games... at the other side it has also has its good things, online buddy's could become real life friends, and so on. As long as you do don't let the imporant things in life go before Renegade, school, sleep,dinner ecta. Enjoy your free time with what you like to do that's why your young!.
