Madu wrote on Sun, 11 November 2007 04:59Hello,
is there a way to make stealthunits invisible to bots? they always see me over the whole map. And
is there a way to make a weapon that sends reinforcements to a location?
Sorry if there are any mistakes, my english isn't very good
The only real way to do it is by changing their team to -2. And have them go back to their original
team when they fire.
