Guys, I think you are missing the point here.

I believe the problem is SERVER SIDE.

How else could you explain that there are servers like the PITS that ALWAYS be negotiated, and servers like DEVSHOUSE that can NEVER be negotiated.

Also, in October (before I left and returned) I could negotiate ALL PORTS ALL THE TIME, however when I returned to the game in January, I could NOT NEGOTIATE MOST ports. keep in mind I in no way adjusted, added, removed, or changed any hardware, software, configurations, or braodband connection. All my stuff is EXACTLY, I mean EXACTLY the same as it was before, so my sudden inability to negotiate the ports MUST be server side. I cannot see any other rationalization.
