Subject: Re: BRenBot 1.52 Plugin problems Posted by Omar007 on Sat, 01 Dec 2007 14:50:02 GMT View Forum Message <> Reply to Message

I installed RenegadeFDS with BRenBot 1.52 FULL 1 day ago and it works fine (got him on WOL). My only problem is that he says in the BRenBot console that he has loaded the plugins, but when i try to use the funsound LEFT or FUN he doesn't make any sound. Also if i ask for my rank ingame he says that there is no rank data found for my account.

All these plugins have i downloaded from: http://new.brenbot.com and i have placed them into the Plugins folder. The README's have i placed in the Docs folder.

Pls help me out

\*\*EDIT\*\*

I worked it out by myself a bit and all the plugins are working fine now. I did added Jukebox now and it works also with funsounds etc. But the ranks doesn't work still. I got rank version 2.03.

Pls help

\*\*EDIT\*\*

Finnaly it all works Even the upload to my webpage works great.
