JavaxcxSir PhoenixxJavaxcxI acknowledge the existance of the clickbot. I deny it's ability to give the player the advantage in a sniper match. I deny the existance of a wallhack cheat. I know the exploits, but since they are were glitches in the game, thats not very well a cheat, now is it?

Yes. Exploiting glitches in a game would be cheating. If a game has a certain glitch, and you work it to your advantage, you're cheating.

So you're saying that when I get inside the wall in a given map, thats using a cheat. Actually, thats a game flaw, and what I'm doing is an exploit. I'm not using a program to enhance myself over others, I'm utilizing something ingame. You may consider it cheating, but it's not "a cheat", for lack of a better word.

LOL... Still trying to justify your cheating?

It's a glitch, a flaw, and you exploit it so you can have the advantage over the others in the game, exploiting it is cheating.

If there was a glitch in Renegade, that when properly exploited, made the "hit zones" of the enemy soldiers enlarge, and made it incredably easy to get a headshot without aiming, and someone used that exploit to get headshots just by pointing the screen in their general direction. According to you, he wouldn't be cheating at all, and this would be perfectly alright. Hey, he's just "utilizing something ingame" (insert some more of your stupid reasons to justify your cheating, here).
