NOD32>Any other Anti-Virus

But for those of us who don't support piracy, AVG works just fine.

I am a major pirate and AVG works just fine. You need to stick with reliable release groups and stay the hell away from crack sites. Places like Demonoid (When it comes back) are VERY reliable because its an exclusive club, no one wants the ban hammer so they don't risk their accounts.

Really though you should just move on to Usenet, there really is no better.
