newcheese wrote on Fri, 14 December 2007 23:47 I think I have the best Anti Virus software out there; a fucking brain.

Get one, it'll improve your computer's performance, you wont have to waste time installing anti virus software and, best of all, you wont even get viruses. Pretty fucking awesome, isn't it?

I don't even know how to get viruses.

By...going to the internet. Retard. Your brain won't help you if your motherboard BIOS died because of a virus attack.
