I just downloaded this file in order to play CNC 95 online.

"THIPX allows you to play C&C95 Multiplayer with up to 4 players,
over the internet or LAN under Windows 2000/XP/2003/Vista."

"Support is available at:

Forum: http://www.renegadeforums.com/index.php?t=thread&frm_id=39&rid=324
IRC: irc://irc.n00bstories.com/bhs_support

THIPX and MPSetup has been developed by Scorpio9a and Silent Kane.

My problem is when the game launches and we go into Multi-player , then Network we don't see
each other there. We followed all the directions in the readme expect for this one...

"If you want to host a game you need to make sure your router/firewall
allows/forwards UDP data on port 5000 to your PC."

Where do you do this at and could that be why we are not seeing each other?
