everytime i join a game WOL or not WOL
or even singleplayer
from game.exe or renegade.exe
i go in the game for 3-4 seconds
then it goes back to renguard and says :

[21:38] Unauthorized file data\config\Desktop_.ini has been found in your renegade directory.

[21:38] Unauthorized file data\Desktop_.ini has been found in your renegade directory.

[21:38] Unauthorized file data\save\Desktop_.ini has been found in your renegade directory.

[21:38] You have been disconnected from RenGuard,

i thought deleting these files would solve it.. but i cant find them , these files dont exist .. hidden or not hidden

and my game closes

i have 1.0323 renguard and core patch 2

when the problem started i expreined a hell of a lag ingame online
