I have <http://bl4ckdmon.gleeboot.com> that I hardly use, Gotzow can tell you how fast the download speed is, uptime is pretty much 24/7 (or until my friend dave doesn't pay the bill)

<http://bl4ckdmon.gleeboot.com/forum>

It's pretty good for a free service I got, I only use it to host porn and some important files that I'll need after I format.

If you want to leech some add me on msn (msn in on my profile) and I'll get you the ftp info.

I don't offer a domain so you'll have to buy that yourself and redirect it to the server's IP, But I can get you a database if needed.
