Exception of c4, the chem sprayer does the most damage to mcts in one second. Salvos, volts, and even rail guns don't kill a building as quickly. 400 rounds of tiberium and a timed c4 will kill a building.

Plus they can walk through tiberium and in single-player they cause visceroids if you don't completely kill the enemy before about 5 seconds after being infected.

Chem-sprayer>Flame-thrower
