I recently reinstalled my renegade from my first decade disk as the one from the original disks was getting a bit screwy (crashing as i try to close it and various other problems)

Now the keys, such as when i pres END in game i get the mine status readout as a PM, no longer work, along with the emote actions that you could do with your number pad.

Anyone want to help out? I would greatly appreciate it.

oh and um, the reason this topic is here... is because i was told all this came with renguard. and i thought it did... i guess it was removed or some such.
