hey i know i am a little late with my reply but i still cant manage to make it..

first i opened field terrain in Jonwil's leveledit, then i 'Add' the light emitter and then 'Make' it , but it says unable to split node!

I think i completely lost track :/ could you show a little ss's from how you did it Slave? That would be really awesome (since i don't understand leveledit for that good yet, im only good with renx)
