He is doing something wrong...

1. the parachute script in the C&C Server that you can use with !para is Reborn's Script. (facing bugged and indeed the parachute wont always go away.

2. since Hex made his Parachute working with facing etc etc, i tried to compile it and i added a chat hook for testing !para (just replaced the other !para command)

regarding 2. : the parachute wont appear. (doesnt work)

reborn: he is doing something wrong..
what do you mean by this?

That code was to show you how to make the parachute attach to a player and recognise when they have stopped falling. It was never meant to be a chat hook like that. You were supposed to attach the script to the player when they are ejected from a chin00k or whatever...

But yes, the facing is set-up wrong, I did fix this later on after I first posted, but I cannot locate the code atm. Under what conditions does the parachute not dissappear?
