Muad Dib15 wrote on Sun, 20 January 2008 14:23I have a Gforce 6800 from biostar that I bought from newegg for 50 bucks. I wanted the most powerful graphics card I could get without buying a new power supply (2.75 to 2.81GHz). This card I might: add runs renegade with shaders on, at max resolution, and gets about 40-50 fps.

They made a PCI version of the Geforce 6800? News to me.
