Subject: Missions cause my client to crash...

That's right. All missions (well, M01, as i can't get to any others without doing M01) crash Renegade to desktop without warning.

The intro movie to MX0 (the first one (Scorpion Hunters)), MX0.mix, and the into movie to M01 work okay, however before it even attempts to load the map, it crashes to desktop.

Anyone have any idea as to why?
