bat66wat6 wrote on Tue, 29 January 2008 19:27LuaScripts.lua is from inside a folder called ExampleScripts is from inside LuaScripts.
All other were found in LuaPlugins.

ExampleScripts and ExamplePlugin were auto-matically installed.

 After fixing it and sending it back to me can you please tell me what was wrong with it? So that i can make sure i do not make the same error twice.

 Oh and im banned from the DCOMProductions site last time i checked. There a bunch of a***oles!
Besides, i aint been on this site since is started back on RA2 about 2 months ago. Thought i'd drop in here instead, your always helpfull->

you got to many end's in your scripts.

if blabla
   thingy
end

not
if blabla
   thingy
  end
 end
end

and i would recommend using lua v2.2 to see if your scripts are ok, the error detection gives you the details on whats wrong.
if all works with v2.2 then port everything to v3.0 by deleting the folders and just have /LuaPlugins/.lua
