It has probably something to do with the scripts people install on vista.

My pc runs Windows Vista (with directx10 vidcard)

-I have a normal Renegade install with 1.037 patch
-CP1
-CP2
-scripts 2.9.2

Works perfect, I never had any problems with it.
Edit: I dont need to use compatibilty or adminrights

Did you install the directx upgrade (also comes with version 3 and higher if im correct)

Because if you did then there is your problem.

In my opinion you dont need higher thn 2.9.2 scripts.
2.9.2 is the best!
