Cheesoda

I am not dumb. Despite what you think.

I get the hint. I remember the smug remarks you posted during my "Problem" regarding I.P bans & my bros hacks.

No it aint my bro. He don't know my Dads password on this comp or mine(13 digits, numbers and letters! )

And Starbuzz. I am familiar with the Registry Editor. I have used it before for other issues. Im sure that any directions you give me wouldn't result in the comp screwing.

Believe it or not I do have some common sense on what I should and shouldn't edit in the regedit.

Just a bit complex in there. I mean every XP registry file and folder on the whole comp is bound to be a bit confusing

At least if I can't stop my dad trying to spy on me or whatever he's up to.

Maybe this knowledge of how to restrict a user could come in handy one day. Most probably if I ever get my own P.C.

So if you could, please post the Directions or PM me them.

Thanks,

bat66wat6
