The GDI and Nod Initiates run faster than normal units. The extras menu actually has the names mixed up, so to clarify: according to singleplayer, the Initiate is the one with 100h/100a and a Chem Sprayer, and the Acolyte than 150h/0a and a Tiberium Auto Rifle.

Edit: screenshots of the GDI and Nod Initates are attached. I'm not sure where/how Whitedragon found the GDI Initiate, since it's not normally accessible from the extras menu.
