Di3HardNL wrote on Mon, 03 March 2008 19:45 What new hardware would i need? like a video card?

and i paged jonwil multiple times, no answers

A new video card would help you in any sense, as your one is so old, that Nvidia has discontinued support, and like I said, is DirectX 6/7 hardware, most games out now are written for DirectX9, and the latest stuff is DirectX 10. How old is your PC?
