Something similar.

When you are nod, go though tunnel, bear left, go up stairs an u come out on centre.

Tib field to the left (you can see Bar ahead). Run across tib field, run up ramp, making sure you are not seen. Wait until the coast is clear, then slide down cliff and run into bar.

If you're feeling confident and the enemy is a bunch of numptys, you could try running to the left of the bar, go behind and then sneak into the rear entrance of the ref.

Ps: MSWindows, Windows sux, Linux is the way
