```
on *:start: {
    /server irc.servername.com
    /server -m irc.servername2.com
    /server -m itc.servername3.com
}

on *:connect: {
    if ($server == irc.servername.com) {
        /nickserv identify password
        /join #chan1
        /join #chan2
        /join #chan3
    }
    elseif ($server == irc.servername2.com) {
        /nickserv identify password
        /join #chan1
        /join #chan2
        /join #chan3
    }
    elseif ($server == irc.servername3.com) {
        /nickserv identify password
        /join #chan1
        /join #chan2
        /join #chan3
    }
}
```

Try that? change the same things that zion said.

hmm thanks but still dont work...see in the ss it opens all my channels in all networks instead of the network it should be in

and idk even know what those 2 network things are with no channels =/
