IronWarrior wrote on Fri, 23 May 2008 20:53A nvida gefore 6150SE nforce 430 is a onboard video, which is always crap.

Get yourself a real Graphics Card, since you're motherboard supports PCI-E, I suggest a cheap 8600 or 8800.
ya im more broke then the bum down the street....im jsut wondring if you think my old vid card might be or work better then the onboard one
