It has nothing to do with the settings.

Renegade actually has three orca skins if I remember it correctly

always.dat 01 orca.dds v_gdi_orca.dds

these ones are mostly used in flyovers and have transparant windows.

always2.dat (in here is the orca you need) v_gdi_orca_m (sixe 512x512 dxt1)

Westwood made multiple orca's with a tiny changes. Same for the transport chopper. (if you want to retexture that it is in always2.dat)

Your skin was 256x256 I rezised it probably it is ugly but I suggest you remake your skin or if you like it how it is now -> (and that is your work to make it right)
