Blazer wrote on Tue, 24 June 2008 09:03Have you considered what would happen if the list were "randomized" everytime? Do you think people would just browse through the random list, or would they sort it?

I believe most people would immediately sort the list, thus randomizing is pointless. And if they wouldn't sort it, they would just pick one of the above. It's proven that they do, because otherwise we wouldn't even have a000000 nicks.
