to play other maps without downloading all you do is go into the svrcfg_skirmish file located in the renegade/data folder, then where it says the map cycle replace it with the following:

MapName01=M10.mix

MapName03=M02.mix

MapName04=M03.mix

MapName05=M04.mix

MapName06=M05.mix

and so on.....

then load a multi player practice game and after the first round on skirmish00 it will load another map....single player levels...

i got this info from ericlaw02 so don't give me the credit if you actually care.

praise goes to ericlaw02

this can be great fun especially if you switch to nods team.
