---

no one is saying you can't fix it

instead some people are saying they'd rather not play with it fixed

i watched a server i've played on for years nearly empty out since the pointmod was added  
if the pointmod was removed i guarantee more people would play there

not everyone wants renegade changed now, six years later after they've learned and embraced it  
the way it was

is it really fair to force it on everyone now? at least make it a serverside option

---
