Yeah I wouldn't install anything made by Norton...

then you're a moron because ghost is probably one of the best and most effective image programs. (at least 8.0 and earlier.)

And where did I say that Ghost wasn't effective? I just said I wouldn't install anything thats related to Norton.
Oh, the irony is just AMAZING. Ever stop to think that you might be the one putting words into someone else's mouth?

He didn't say you thought it was ineffective. He said you're a moron because you're refusing to use a good program because of it being a Norton product.

Right and he called me a moron because he believes Norton is an effective imaging program and because I said not to install, somehow translates into it doesn't work very well.
