Quote:Beacon Spamming

This is when you just plant pointless beacons in your own base, two reasons it isn't allowed.

1. If the opposing team places a beacon in your base, locating is made harder as your own team could be confused by the beacon you placed in your own base.
2. Sometimes towards the end of the game we seem to get a craze of placing beacons just to waste cash, or generally to try and annoy the other players.

Beacon spamming will get you kicked if you are caught, we have a script which shows when beacons are placed, and who placed them.
