they're trying to make renegade better with it, but for that server type specifically i know people like it how it is; it's the most populated server, and whatever it's doing is apparently working

putting the pointmod on it could ruin whatever it is that makes people keep coming back for more

are we working on a compromise for when the patch comes out or after the beta testing is complete?

Why would they test something that's already been in place for several years? I'm pretty sure they'd rather test the points fix because that's what they've been working on.
