Subject: PT scrolling/pages

So, the PT list can be pretty cluttered, and I'm sure there's mods that don't want to resort to using arrows or the extras list.

So I got a small idea- How about making an increased PT limit, and anything that goes past the current size, is like a second page? Or have a scroll wheel of sorts.

Maybe not an ENTIRELY necessary thing to do, but it's always nice not having limits on how many units you can have. And yes, I know you can have the "skins arrows", but it seems odd having it as the same PT icon list as a completely different unit.
