I'm tired of the stipid loading pressets tree screen i use jon wills version of LE and renegade demo. I fixed registry to Westwood>Renegade>InstallPath... i still don't have any presets and no folders in mod folder except Editorchache and level i created a presets folder put objects.ddb and it's stuck when it tryes to load *Mod folder name*/characters/DUMMY.w3d. I don't remember how i fixed this problem on other pc.
