JPNOD wrote on Thu, 07 August 2008 01:18FTP isn't secure , not that it matters for your purpose I guess.
But if you want something secure go with SFTP.
Besides it's pretty fun to find out how these kinds of programs work and it will teach you the basic's of portforwarding
well i just want it to transfer large files or folders...(well over a few gigs) to someone that i can personal give a cd or dvd to and cant upload to a webside
