ok heres my problem, i can get online and when i go to multi-play internet i get the whole screen of advanced game listings, quik match, chat (like it should show up) but then when i go to click advanced games listing it tells me " requesting server list "   and it ALWAYS times out i havent been able to get on for 3 weeks now and nothing that my ISP or Westwood Tech support has said worked. they told me to check some ports on my " firewall " but i have a dial up connection and dont have firewall so WTF do i do!???????????????   i used to be able to get on and play.
