Votes are votes. You cannot simply void 73 votes due to the fact that none of the 'no' voters have put up a sufficient argument. Results now appear inconclusive, and when the poll is inconclusive, then there is no change. IMO, PT glitches should not be fixed.

However, since the arguments in this topic do lead towards the PT glitch being fixed, and if the people at EA or w.e. do decide to fix it, then i still believe that the server owners shud have an option as to whether or not they will have this pt glitch on or off due to the fact the votes are equal.
