CarrierII wrote on Fri, 14 March 2008 20:53Now, a pascal program to Spam more and more *'s on the screen until some sort of overflow is achieved:

```
var
 I : integer;
 S : string;
begin
I := 0;
Repeat
 Inc(I);
 S := DupeString('*', I);
 Writeln(S);
Until (False);

end;
```

I take your pascal and raise you one assembler:

```
__asm
 {
__Label_Start:
 mov eax, 2Ah; //*
 push eax;
 call dword ptr putchar;
 jmp __Label_Start;
 }
```
