The DS-i is pretty much a mixed bag. On one hand, you've got a slightly smaller package, bigger screen, an SD slot for, er, home brew games and music/video, etc., and a 3.0 megapixel camera.

On the other hand, you don't get the GBA slot, the battery life is cut in half, and you have... a 3.0 megapixel camera. Oh, and since the DS Lite is selling so well, it won't be sold in America for some time.

I just want to see more about the new PSP.
