R315r4z0r wrote on Tue, 14 October 2008 04:27I have no password set. What happens is I get a welcome screen with my 1 and only account name listed. I click it and it logs me in. No password or input required... just click and log in.

You can set a auto login account using Tweak UI. I think there is some setting somewhere by default as well, but I don't know where to find it.
