I love this map... kinda hard 2 get into the GDI base w/o using some heavy armour or risking the mine field .

You can park a vehicle behind the trees for a quick repair in the field...the AGT missile will hit the tree and save you some damage.

As hotwire I was able to walk right into the Nod base by hugging the minefield wall...didnt set off any mines and I was right behind the PP....if I had a beacon it would be bad for Nod

I did that with my recon and I made it throught the minefield to the PP as a NOD Tech on my 3rd attempt
