The screenshot shows the Windows Disk Management console. At the top, there is a menu bar with 'File', 'Action', 'View', and 'Help'. Below the menu is a toolbar with various icons for disk management. The main area contains a table with the following columns: Volume, Layout, Type, File System, Status, Capacity, Free Space, % Free, and Fault Tolerant.

Volume	Layout	Type	File System	Status	Capacity	Free Space	% Free	Fault Tolerant
(C:)	Partition	Basic	NTFS	Healthy (S...)	6.04 GB	1.42 GB	23 %	No

Below the table, there is a detailed view of Disk 0. It is a Basic disk, 6.04 GB in size, and is Online. The partition (C:) is a 6.04 GB NTFS partition, which is Healthy (System). Below this, there are sections for Disk 1 (Removable (E:)) and Disk 2 (Removable (G:)), both of which have 'No Media' inserted. There is also a section for CD-ROM 0 (CD-ROM (F:)) with 'No Media' inserted. At the bottom left, there is a legend indicating that a blue square represents a 'Primary partition'.
