Hi for all that don't know of this i would like to share it to u.

It is not a hack
There is no program that does it.
Not intented for people that have other accounts that isn't yours: Would be a cool prank to pull on your friends tho

1.Go to this folder C:\Documents and Settings\All Users\Application Data\Microsoft
2. Delete this folder from there or move it User Account Pictures
Look at your start menu   no pic in there.
3.Go to control panel user accounts your account and change your name.
4.Here comes the hard part,Here we will name it to nothing. Activate Num-Lock. If you have aLaptop, then use the FN button and choose NumLK.
Rightclick on the file and press Change name. Remove the name and hold the ALT button while wrting the code 0160 from the right number pad. Release the ALT button and you should have a character looking like a space symbol.
5.Save
6.Go to start menu   no pic and no name

Here is a pic of mine

Coming Soon A Video.
