Hi well its not so much which version of dll you use (depends what your doing really) just as long as you use say scripts.dll's that are the same version that you used in LE to mod with.

So if you use say scripts 2.9.2 or newest scripts 3.4.4 then just make sure those are the same in LE as in your (FDS). then your good to go.

As for which version of the scripts.dll's you use is totaly up to you to figure out. just make sure your using the same version(eg: 2.9.2 or 3.4.4 or whatever version) is in your FDS as well.

I believe www.renhelp website can help you in the tut department for this if you need.

Good luck to you and enjoy.
