Here are a couple of screenshots. I like playing with this online =)

Whats still left to do

- Add lamps to the ceiling
- Fix up the gyser (you can see a little hill in one of my screenshots, thats going to be the gyser)
- Add some fishes in the space between the water.
- Changing a couple of textures and lighting.

I don't know yet what else i should add, and I am looking for good looking tiles/floor texture to match up with this Islands.
